Project Report Information

Your report must be 3 pages long. You must use a two-column format, 10-point *times new roman* font, and your lines/paragraphs must be single-spaced. Your report must not include any code. However, you must make your code available on a web page or a repository and provide the pointer to that page in your report.

The report must be organized as follows:

1. Introduction – Motivate and introduce the problem you are solving. Very briefly summarize your methodology, your experiments, and your important results.
2. Related work – Summarize the existing work related to your problem.
3. Adversary model – Describe the adversary you are securing against.
4. Methodology – Describe your solution and any other methods you have used to solve your problem.
5. Implementations/Experimentation – Describe your experiments and your results. Discuss your results.
6. Conclusion – Summarize your work and your results. Indicated any future directions.
7. References – List all the references you have used for this work.

Reports are due by 11:59 PM MDT on April 29th 2023. These must be submitted in the *pdf* format on Canvas.
